

ATHOS '12

DESIGN BY PAOLO PIVA

Athos '12 has two lengths, both in the fixed and extendable version, that can seat up to twelve people by using a concealed mechanism. The V-shaped metal frame supports a thick top that is softened by rounded edges created with a complex milling procedure that maintains a uniform grain on the entire surface. Through this program it is available equipped with a system for lengthening the tabletop, with smoked oak top and black chromed steel frame.
