The CH07 Shell Chair is a clear manifestation of Hans J. Wegner's belief that a chair should always be comfortable, have no backside and should be beautiful from all sides and angles. The design's floating lightness is achieved through its wing-like seat and curved backrest held by a frame with three arched legs. The chair's signature seat and backrest are created from upholstered form-pressed veneer, cradling the user in generous comfort.

ICONIC · FORM-PRESSED STABLE VENEER · RESIDENTIAL · HOSPITALITY · WORKPLACE · EDUCATION
