

CH338IDining Table

HANS J. WEGNER

CARL HANSEN & SØN

DESCRIPTION

Hans J. Wegner's Dining Tables from 1962 is made of solid wood. With its inviting form and the possibility of expanding the seating, the table is suitable for both everyday use and for parties. The design is characterized by its finely processed elliptical table top and its elegant, tapered legs. The harmonious shape of the solid table top is one of the most eye-catching features, and with the wood's cross grains, one can hardly see the join between boards.

Table top and base: solid oak with soap, lacquer, oil or white oil. Solid beech in soap, lacquer or oil. Solid walnut in lacquer or oil

Leaves for table center: solid wood or MDF in grey or black paint
