Choose a cosy corner, add the new Copenhagen floor lamp and you instantly have an ambience with elegance.

“Most people decorate a room first with furniture, then with lighting secondary, as an after-thought,” notes &tradition CEO / Founder Martin Kornbek Hansen. “Given the simple yet striking shape of Copenhagen, it makes sense to do this process in reverse. Start with the lighting, then add the furniture. The dimmer functionality gives you the extra freedom of adjusting the light to match your mood.”

The satinised opal glass shade emits a soft ambient light, while the LED dimmer allows you to adjust the light from a colder whiter light for daytime to a warmer light at night time for a calmer effect. Technology reflecting the Nobel Prize findings about our inner clock and therefore the impact of light on our sense of wellbeing.

If you are looking for an iconic lamp with loads of atmosphere, you've just found it.
