

Gender is an armchair, one of a kind. A combination of materials and colors with a wide range of uses: the soft padded interior converses with the rigid exterior, enhanced by a colored leather edge that accentuates its sinuosity.

The fabrics cling to the curves of the armchair and come in seven different set color combinations. The backrest responds to pressure by reclining about 12° and returning automatically to its original position.

A pouf is also available in the same combinations, with leather footrest band to protect the surface from any damage. Two end sections in black saddle leather or shimmering leather, cover the feet of Gender to round things off.
