Made in Italy

## DESCRIPTION

*Juli Comfort small armchair by Werner Aisslinger follows the lead of the shell for the Juli Plastic to evolve into an incredibly soft and comfortable padded chair – perfect for furnishing private homes, lounges and restaurants. The recycled plastic shell is made using an injected technique, for extreme durability; the seat, in polyurethane and foam, can be upholstered in a selection of fabrics. Thanks to the chromatic combinations that derive from careful pairing of the base, color of the plastic shell and the seat upholstery, Juli Comfort offers numerous possibilities to customize each piece for a contemporary, yet classic look.*
