

JULI RE-PLASTIC

WARRANTY

DESIGNER
Werner Aisslinger

YEAR
2022

CATEGORY
Chair

ENVIROMENT
Outdoor

COUNTRY OF ORIGIN
Made in Italy

DESCRIPTION

Juli armchair by Werner Aisslinger continues to be the protagonist of new successful experiments. Extremely comfortable thanks to a more and more cozy curved shell, Juli Re-Plastic is one of Cappellini's novelties, the first sustainable outdoor piece of furniture. The four-legs base is made of AISI 316 stainless steel and the shell is realized with recycled and recyclable polypropylene reinforced with fibreglass. Obtained from recycled domestic waste, in particular used packaging, this kind of polypropylene allows a reduction in gas emissions of approximately 54%. Juli Re-Plastic is presented in grey. Thanks to its high wear resistance, this product is particularly suitable for hospitality contexts, as well as for domestic environments.

FINISHES

SHELL
grey, resulting from the natural color of the granule

BASE
435 satin stainless steel

NOTE
On request the chair is available with water drainage.

MATERIALS

SHELL
100% recycled and recyclable shell in fibreglass reinforced polypropylene, additived with UV protection

BASE
4-legs metal base. Tube diameter: Ø20mm

FEET
black plastic

The shell is made with a post-consumer granulate so the natural color of the greyish granule can vary between the shells and be more or less clear. The surface may have dots of different colors, not to be considered a defect.
