

The KAZIMIR table by Phillip Mainzer for e15 mixes bold geometric forms with exclusive materials like European oak, unfilled travertine, galvanized zinc, brushed brass and powder coated steel to create a table that is uniquely inspired by Supremacist compositions. Generously proportioned, and available in varying lengths from approximately 2000mm to 3600mm, we love the versatility that this table offers for both private spaces and public domains. Our collection also includes KAZIMIR 'RAW' – this version features solid wood boards, measuring up to 250mm in width, which exposes the brushed natural edges of the tree. KAZIMIR's construction embodies the ethos of e15 – consistent, progressive design coupled with high-grade materials and innovative, hand-crafted production methods.
