

OW149-2 | Colonial Sofa OLE WANSCHER

DESCRIPTION

The OW149-2 Colonial Sofa, designed by Olé Wanscher in 1964 has been recently reintroduced along with the Colonial chair and the Colonial coffee table. The sofa features a relatively simple lattice construction, its elements supporting one another. The double center legs provide necessary strength while the sofas slender dimensions are kept minimal. The front and back legs are made of round timber. Slightly curved armrests rise to a point before taking a vertical turn downwards- a well-known feature of Wanscher's design. The OW149 Colonial chair is available in mahogany, cherry, walnut and oak with a hand woven cane seat, while the cushions come in a range of fabrics and leathers.
