

Classic comfort and elegance bespeak the minimal yet versatile proportions of the 8 sofa, whose modular structure combines premier construction skills and bespoke upholstery expertise in every detail. 8's extruded aluminum base, the essential line of its overall design, allows creative compositions of varying lengths in a wide array of configurations. Executed by expert hands to ensure a precision-perfect fit, the upholstered cushions slide seamlessly into the central slots of its flexible panels, while the sofa's light, soft lines are complemented by feather-filled inserts in the seat, back and arms. Finished to the highest standards, the 8 sofa is also available with polyester inserts and in the more essential 8 Cube version without side and back panels.
