

# PAPILIO

DESIGN BY NAOTO FUKASAWA

The design allows both an erect and a more relaxed position by resting on one of the wings of the armrest. The formal balance results from the constant thickness of the body and by the profile of the seat, which is sinuous at the top and ends in the light steel frame. Removable covers with a metal zip on the back, which becomes a decorative motif.

Serra 153

Bright chromed steel
