

SOFT CORNERS LOW TABLE LINDE FREYE TANGELDER

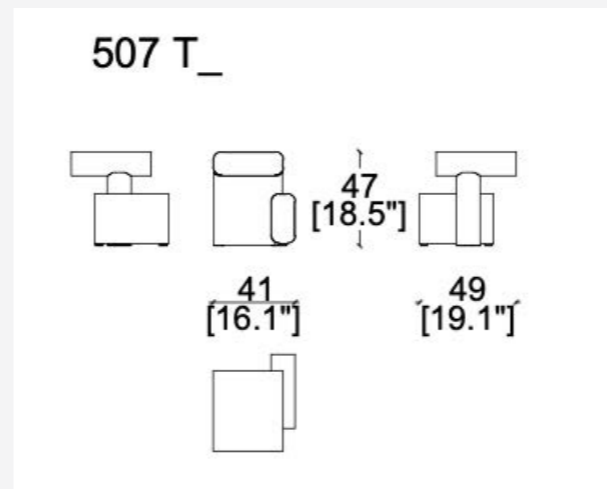

DESCRIPTION

Soft Corners is a collection of architectural pieces, marking the Cassina debut of Dutch designer Linde Freya Tangelder. The industrial-style low table, made of stainless steel, is a functional piece with minimalist lines and a sculptural look designed for contemporary decor. It is composed of three parts that fit together seamlessly but with an interesting interplay of negative and positive space. Curved lines echo the upholstered pieces of the same collection and thus can overlay one of the three ottomans in an eloquent juxtaposition of warm and cold materials. In addition to providing a table-top surface, magazines or objects can be placed inside it, underscoring the versatility of its design.

STRUCTURE

In stainless steel with antiqued or burnished finish, or in steel painted cast-iron colour.

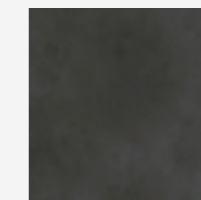

DIMENSIONS

FINISHES

Brushed
Stainless
Steel

Textured Cast
Iron Painted
