

TRAMONTO A NEW YORK SCREEN G E A T A N O P E S C E

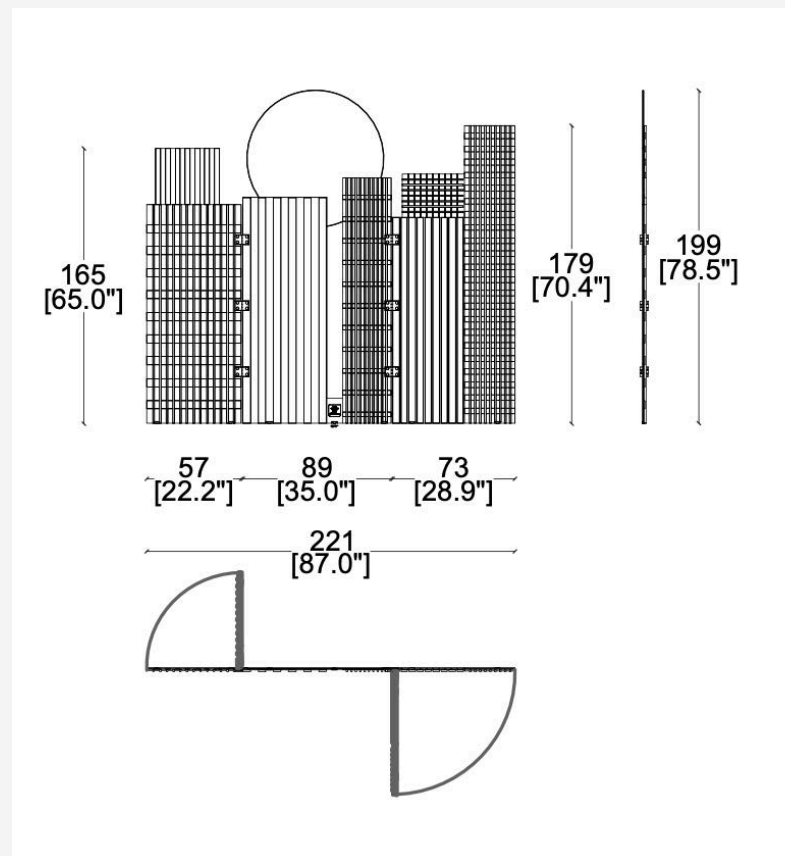

DESCRIPTION

Light shines over the city as the sun sets on New York; a kaleidoscope of colors streams through the windows of the skyscrapers illuminating the design screen by Gaetano Pesce. Inspired by the iconic sofa, Pesce has created the triptych room divider of the same name that reimagines the New York skyline as a work of art for the home. The city "the never sleeps" is recreated in phases by pouring colored resin into molds, producing, layer by layer, striking hues of the building facades. This complex, handcrafted process means that no two pieces are exactly alike. Cassina guarantees the uniqueness of each piece with a plaque indicating the year of the project, its sequential production number, the Cassina logo, and the signature of the artist, Gaetano Pesce.

STRUCTURE

Panels: colored semi-transparent polyurethane resin
Hinges, feet and plate: in satin finish brass
Plaque: Cassina logo and artist's signature with year and sequential production number
